

 Daily Lessons & Activities
for K-5 Students The following weekly lesson planner is a tool you can use with your child to help guide learning at home. Each day will include 5 different grade-level lessons to support what your child is learning at school. These lessons are designed to be done independently by K-5-aged students, although we recognize every child's experience may vary. Some of these lessons may be easier than others, which is fine, as review of past material allows your student to practice valuable skills. For additional weekly planners, lessons, and resources, visit hand2mindathome.com. **Math & Literacy Video Lesson (5-15 min)** These video lessons are created by classroom teachers, allowing children to continue learning, even at home. These videos will teach children a different concept every day. **Math & Literacy Activities (15-30 min)** Reinforce the video lessons with these quick activities to practice the day's skill. **SEL Activities (15-30 min)** Social-Emotional Learning (SEL) is the process through which children and adults understand and manage emotions; set and achieve positive goals; learn, observe, and model empathy; establish and maintain positive relationships; and make responsible decisions. Learning to manage feelings, respond positively to stressful situations, and get along with others is a vital part of childhood development.
